FEATURES

	Issue	page
Aboriginal science for the ecologically sustainable future. *M J Christie*	120	26
A school-based Science Expo. *A Beruldsen & D Mau*	121	28
Assessing open-ended practical investigations. *T Bryce*	123	12
Assessment of learning in science : The need to look closely at item characteristics. *L J Rennie & L H Parker*	123	56
Assessment of students' understanding of science concepts using diagnostic instruments. *D Treagust*	123	40
Biological technologies: Some directions for Australian biology education. *G White*	120	14
Criterion Based Assessment and school science . Part 1: Framing criteria and standards. *R Pallet & J Rataj*	123	48
Do you know your body? Assessing understanding. *J Loughran & D Corrigan*	123	44
Genetic engineering and its social implications. *W J Peacock*	121	15
Making the difference for talented children in science. *B Ferry*	120	8
Merging the boundaries of science. *C Milne*	122	8
Nuclear science experiments in high school. *G C Lowenthal & I McMurtrie*	121	22
Science as part of our culture. *M Gore*	122	14
Science teacher education in New Zealand : A new approach. *D Hodson*	122	24
Some views on, and developments in, pre-service and inservice teacher education in South Australia. *R Tindall*	122	27
Student managed assessment. *G Hildebrand*	123	19
Teachers' reactions to a change to a constructivist teacher/ learning strategy. *B Hand, C Lovejoy, G Balaam*	120	20
The assessment of science practical work. *M Rosier*	123	32
The development of national subject profiles. *R G Jenkin*	123	8
The Physics Development Program. *P Arthur*	122	32
The Royal Institution. *G Martin*	121	6
The Victorian Science Achievement Study : Implications for practice. *B Doig & R Adams*	123	25
Using analogies in secondary chemistry teaching. *R Thiele & D Treagust*	121	10
Why don't girls study mathematics and physical science ? *J Stewart*	122	18

SCIENCE NOTES

Acid-base balance during exercise. *R Pillans*	120	48
A practical approach to chemical equilibrium 3 : Le Chatelier's principle. *G Connor*	122	55
A school-made colorimeter. *R Skabo, C Turner, P Turner*	120	46
Assessing some student views about science. *M Evans & R A Shibeci*	123	69
Collapsing can: the cheap alternative. *R Lambert*	121	35
Colourful pH column. *B Pearsons*	121	36
Concept mapping. An assessment tool? *J Gibson*	123	72
Dynamics of a bouncing ball: How to measure a millisecond time interval without a clock. *I Cooper, M Gunnourie.*	120	56
Earth science resource centre for schools. *F Parker*	121	45
Exploring concepts of current and voltage. *J Pearce*	120	59
Fire writing. *B Pearsons*	121	37
Geochemical analysis:An exercise for Years 11&12. *B Nicholls*	120	52
How to calculate the distance around the earth using a stick, a watch, a compass, a map, and a telephone. *R B Thurman*	121	48
How students perceive process questions. *M Mannering*	123	63

Concept mapping. An assessment tool? *J Gibson*	123	72
Dynamics of a bouncing ball: How to measure a millisecond time interval without a clock. *I Cooper, M Gunnourie.*	120	56
Earth science resource centre for schools. *F Parker*	121	45
Exploring concepts of current and voltage. *J Pearce*	120	59
Fire writing. *B Pearsons*	121	37
Geochemical analysis:An exercise for Years 11&12. *B Nicholls*	120	52
How to calculate the distance around the earth using a stick, a watch, a compass, a map, and a telephone. *R B Thurman*	121	48
How students perceive process questions. *M Mannering*	123	63

Investigations into the zinc coating of galvanised steel. *A Davies*	121	57
It's all done with curved mirrors. *B Dolby*	122	42
Legal awareness for science teachers 1: Introduction. *J Manson*	121	58
Legal awareness for science teachers 2 : Prevention and defense against negligence. *R Manson*	122	57
Lego racers *J Klose*	120	39
Making the most of your overheads. *R Baldock*	120	40
Mineral fluorescence viewer. *R Varisco*	120	51
More magic with the van de Graaff generator: levitation! *G Thurlow*	120	33
More simple ideas using the overhead projector. *C Cook*	122	49
Pipehenge : A climbing frame for teaching astronomy during daytime. *E Jackson*	122	45
Physics, sport and the great outdoors. *M Caon*	122	50
Science and Australian Studies : A copper story. *J Thomas*	122	52
Science, technology and society: getting to the bottom of the issues. *R Smith*	121	54
Slaying the exam fear dragon: a recipe for building confidence and skills. *C Philips*	123	61
Some simple chemistry puzzles. *T Boyles*	120	36
The fourteenth Singapore Youth Science Fortnight, 1991. *S Stocklymayer*	122	35
The game of life. *A Wheeler*	122	47
The Greenhouse Effect. *S Zarins*	121	51
The law of pressures: physics practical using the VELA. *D Collins*	121	50
The ship in the canal. *N Mermelengas*	120	55
Unwinding the starch spiral. *B Williams*	120	43
Using an air/ water powered rocket for teaching science. *W P Palmer*	120	34
Using computer animation to demonstrate wave concepts. *R Parham*	122	37
Using TAPS materials in school. *G Lister*	123	66
Using the VELA in biology experiments. *A Crierie*	121	38
Vibration in space. *LA Wood*	121	46
What is an electro-chemical cell? *A Davies*	120	50

RESEARCH

Country students and the tertiary entrance score. *J Rowell, C Dawson & J Pollard*	123	76
High school biology achievement in Australia from an international perspective. *J Menis & B J Fraser*	121	61
Monitoring learning environments in science laboratory classes. *C J McRobbie & G J Giddings & B J Fraser*	122	60

SCIENTIST'S VIEWPOINT

Professor Andy Cole	120	65
Professor Helene Marsh	122	67
